

## Ceasefire brings relief to bond markets

### Market recap

Front-month oil prices fell last week after the U.S. and Iran established a fragile ceasefire, though December WTI futures held slightly higher at \$75 per barrel. The March CPI report, among the first data to reflect the war's impact, showed a sharp jump in energy prices, lifting headline inflation to +0.9% month-over-month and +3.3% year-over-year. Core inflation came in close to expectations at +2.6% year-over-year, as energy price increases typically take longer to filter through to core.

U.S. Treasury yields fell broadly, with the 10-year ending the week 3 basis points (bps) lower at 4.32% last week. The Bloomberg U.S. Aggregate Bond Index returned +0.33%. All major sectors outperformed similar-duration Treasuries, led by emerging markets (+105 bps), preferreds (+81 bps) and high yield corporates (+68 bps).

### Outlook

Amid ongoing geopolitical uncertainty and evolving economic data, we have revised our macroeconomic forecasts. We now project real GDP growth of 1.8% for the year, modestly below our prior estimate, reflecting the drag on consumer spending from elevated oil prices. We also expect core inflation to decelerate by year-end, though by less than previously forecast, settling at 2.8% rather than the lower level we had anticipated.

These revisions lead us to expect the U.S. Federal Reserve to remain on hold longer than we previously forecast. A first rate cut, which we had anticipated around mid-year, is now expected in the second half of 2026, with a second cut likely slipping into 2027. We continue to forecast a 4.00% to 4.25% range for the 10-year Treasury yield, with a bias toward the lower end by year-end.

### KEY TAKEAWAYS

- A fragile U.S.-Iran ceasefire eased near-term oil market stress, pushing Treasury yields lower and tightening credit spreads broadly.
- Oil prices declined and all major fixed income sectors posted positive returns, with most outperforming similar-duration Treasuries.
- March CPI showed a sharp energy-driven spike in headline inflation; core inflation remained relatively stable.

## What we're watching:

### APRIL

#### 14

- PPI inflation

#### 16

- China first quarter GDP
- Euro area CPI inflation

## U.S. Treasury market yields

Maturity	Yield	Change (%)		
		Week	Month-to-date	Year-to-date
2-year	3.80	-0.04	0.00	0.32
5-year	3.94	-0.04	0.00	0.22
10-year	4.32	-0.03	0.00	0.15
30-year	4.91	0.00	0.00	0.07

**Near-term geopolitical relief lifted bond markets last week, even as updated forecasts point to slower growth, stickier inflation and a more patient Fed.**

## Fixed income characteristics and returns

Index	Yield to worst (%)	Spread (bps)	Effective duration (years)	Returns (%)		
				Week	Month-to-date	Year-to-date
Municipal	3.62	–	6.73	0.82	1.14	0.97

<sup>1</sup> Yield difference between the Bloomberg High Yield Municipal Index and the 20-year AAA MMD scale. <sup>2</sup> Option-adjusted spread to Treasuries. <sup>3</sup> Spread refers to the 3-year discount margin. Duration is estimated based on the frequency of the reset date.

Source: Bloomberg L.P. and Standard & Poor's, 10 Apr 2026. Performance data shown represents past performance and does not predict or guarantee future results. Unless otherwise noted, the index is Bloomberg. All index returns are shown in U.S. dollars. Yield to worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. Effective duration (expressed in years) measures the price sensitivity of a fixed-income investment to a change in interest rates, considering that expected cash flows will fluctuate as interest rates change. Index performance is shown for illustrative purposes only. Index returns include reinvestment of income and do not reflect investment advisory and other fees that would reduce performance in an actual client account.

### Important information on risk

Investing involves risk; principal loss is possible. Debt or fixed income securities are subject to market risk, credit risk, interest rate risk, call risk, derivatives risk, dollar roll transaction risk and income risk. As interest rates rise, bond prices fall. Below investment grade or high yield debt securities are subject to liquidity risk and heightened credit risk. Preferred securities are subordinated to bonds and other debt instruments in a company's capital structure and therefore are subject to greater credit risk. Foreign investments involve additional risks, including currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks may be magnified in emerging markets. Asset-backed and mortgage-backed securities are subject to additional risks such as prepayment risk, liquidity risk, default risk and adverse economic developments. The value of convertible securities may decline in response to such factors as rising interest rates and fluctuations in the market price of the underlying securities. Senior loans are subject to loan settlement risk due to the lack of established settlement standards or remedies for failure to settle. These investments are subject to credit risk and potentially limited liquidity, as well as interest rate risk, currency risk, prepayment and extension risk, and inflation risk. Any investment in collateralized loan obligations or other structured vehicles involves significant risks not associated with more conventional investment alternatives.

Investors should contact a tax professional regarding the appropriateness of tax-exempt investments in their portfolio. If sold prior to maturity, municipal securities are subject to gain/losses based on the level of interest rates, market conditions and the credit quality of the issuer. Income may be subject to the alternative minimum tax (AMT) and/or state and local taxes, based on the state of residence. Income from municipal bonds held by a portfolio could be declared taxable because of unfavorable changes in tax laws, adverse interpretations by the Internal Revenue Service or state tax authorities, or noncompliant conduct of a bond issuer. It is important to review your investment objectives, risk tolerance and liquidity needs before choosing an investment style or manager.
