

Small Cap Value Opportunities

Marketing communication | As of 30 Jun 2025

Strategy description

Small Cap Value Opportunities seeks to identify undervalued smaller capitalization companies in industries with positive or improving fundamentals.

At-a-glance

Benchmark	Russell 2000® Value Index
Position size	2 – 4% with no issue greater than 5% at time of purchase
Market cap range	\$50 million – \$6 billion
Number of positions range	40 – 70

Investment process

Extensive bottom-up research seeks to uncover investment value created from investor overreaction, misperception and short-term focus. Qualitative factors include restructuring, management strength, shareholder orientation, and the ability to capitalize on improving industry fundamentals. The portfolio is continuously reviewed and adjusted to target appropriate risk/reward.

Average annualized total returns (%)

	Inception date	QTD	YTD	1 year	3 years	5 years	10 years	Since inception
Gross	01 Jul 96	3.85	-2.25	10.93	16.31	17.32	9.05	10.81
Net	01 Jul 96	3.08	-3.71	7.67	12.91	13.89	5.84	7.55
Benchmark		4.97	-3.16	5.54	7.45	12.47	6.72	8.72

Performance data shown represents past performance and does not predict or guarantee future results. Performance shown is based on the institutional composite. Net of fee performance is calculated using the highest applicable annual fee of 3.00%; applied monthly. The value of the portfolio will fluctuate based on the value of the underlying securities. Individual returns may vary based on factors such as the account type, market value, cash flows and fees. Current performance is preliminary and may be higher or lower than the performance shown. Final numbers are available upon request. Total returns for a period of less than one year are cumulative.

- 1

Nuveen Asset Management, LLC ("NAM") is a registered investment adviser under the Investment Advisers Act of 1940, as amended, and a subsidiary of Nuveen, LLC. Registration does not imply a certain level of skill or training. NAM provides investment management services to a broad range of clients on a discretionary basis or non-discretionary basis. NAM offers its services either directly to clients (fee-based "direct-advisory" accounts, fee-based "institutional" accounts and "commission-based" accounts) or through broker-dealer and other financial intermediary programs (fee-based "advisor-sponsored" accounts).
- 2

Effective 31 Dec 2021, NWQ Investment Management Company, LLC and Santa Barbara Asset Management, LLC merged into NAM. Performance presented prior to 31 Dec 2021 occurred while the portfolio management team was affiliated with NWQ, which excluded fully bundled (SMA/Wrap) assets from the NWQ firm definition. Effective 01 Jan 2022, the performance of fully bundled (SMA/Wrap) accounts will be included in this composite.
- 3

The performance results presented herein are based on the Firm's institutional composite results.
- 4

The Small Cap Value Opportunities composite (the "composite") inceptioned on 01 Jul 1996. The composite contains all discretionary institutional and dual contract/partially bundled fee portfolios managed within the Small Cap Value Opportunities strategy. Prior to 01 Jan 2020, the composite consisted of all discretionary institutional portfolios managed within the strategy. Accounts in the composite use an approach which seeks to invest client assets primarily in common stocks of undervalued smaller capitalization companies in industries with positive or improving fundamentals. Accounts in the composite also invest in foreign securities in the form of American Depositary Receipts (ADRs) and foreign corporations traded on U.S. exchanges. The composite name changed effective 31 Dec 2021 to "Small Cap Value Opportunities"; the previous name was "NWQ Small Cap Value."
- 5

The composite's benchmark is the Russell 2000® Value Index. The Russell 2000® Value Index measures the performance of those Russell 2000® Index companies with lower price-to-book ratios and lower
- 6

forecasted growth values. Index returns are provided to represent the investment environment during the time periods shown. For comparison purposes, index returns do not reflect transaction costs, investment management fees or other fees and expenses that would reduce performance in an actual account. It is not possible to invest in an index.
- 7

Composite and benchmark performance presented is calculated on a total return basis, which includes the reinvestment of all income, plus realized and unrealized gains/losses, if applicable. Individual account returns within the composite will vary depending upon, among other things, account restrictions, timing of transactions, contributions, and withdrawals, and market conditions at the time of investment. The U.S. dollar is the currency used to express performance.
- 8

Gross of fee returns for the composite are presented after all trading expenses. Gross returns do not reflect the deduction of investment management fees or any other expenses that may be incurred in the management of the account. Under the separately managed accounts program, the client's gross return on investment will be reduced by the fee paid to the program sponsor, a portion of which will be paid to the Firm for its services to the client. The fee is described in the agreement between the client and the program sponsor; the Firm's management fee is described in Part 2A of the Form ADV and is available upon request.
- 9

Net of fee performance was calculated using the highest applicable annual fee of 3.00%. Net of fee returns have been calculated by reducing the gross of fee return by deducting 1/12th of the highest applicable annual fee from the monthly gross composite return. The net effect of the deduction of fees on the annualized performance, including the compounded effect over time, is determined by the relative size of the fee and the account's investment performance.
- 10

Past performance is no guarantee of future results.
- 11

Important information on risk

All investments carry a certain degree of risk, including possible loss of principal, and there is no assurance that an investment will provide positive performance over any period of time. Equity investments are subject to market risk or the risk that stocks will decline in response to such factors as adverse company news or industry developments or a general economic decline. Value style investing presents the risk that the holdings or securities may never reach their full market value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values. In addition, value style investing may fall out of favor and underperform growth or other style investing during given periods. Investments in smaller companies are subject to greater volatility than those of larger companies. This strategy may invest in American Depositary Receipts (ADRs). ADRs do not eliminate the currency and economic risks for the underlying shares in another country. The strategy's potential investment in non- U.S. stocks presents risks such as political risk, exchange rate risk and inflationary risk, which included the risks of economic change, social unrest, changes in government relations, and differing accounting standards.

Minimum investment is \$100,000.
