

Nuveen Multi-Asset Income Fund (NMAI)

Marketing communication | 3Q 2024 | As of 30 Sep 2024

Fund description

The Fund's investment objective is to provide attractive total return through high current income and capital appreciation.

The Fund dynamically invests in a portfolio of equity and debt securities of issuers located around the world. This dynamic investment strategy uses a risk-based framework in which any amount can be allocated to an asset-class at any time. The Fund may invest in equity and debt securities of any type without limit. The relative allocations of the Fund's managed assets for investment between equity and debt securities, and relative allocations to the different types of equity and income strategies, will vary from time to time, consistent with the Fund's investment objective. The Fund uses leverage.

Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Allocation Risk.** The Fund's ability to achieve its investment objective depends upon the Fund's sub-adviser, Nuveen Asset Management's skill in determining the Fund's allocation to different sub-advisers and strategies. There is the risk that Nuveen Asset Management's evaluations and assumptions used in making such allocations may be incorrect. **Leverage** increases return volatility and magnifies the Fund's potential return and its risks; there is no guarantee a fund's leverage strategy will be successful. **Common stocks** have experienced significantly more volatility in returns and may significantly underperform relative to debt securities during certain periods. **Preferred securities** are subordinated to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk. Issuers of **debt instruments** in which the Fund may invest may default on their obligations to pay

principal or interest when due. The Fund is subject to **interest rate risk**; as interest rates rise, bond prices fall. Investments of **below investment grade** quality are regarded as having speculative characteristics with respect to the issuer's capacity to pay dividends or interest and repay principal, and may be subject to higher price volatility and default risk than investment grade investments of comparable terms and duration. Lower credit debt securities may be more likely to fail to make timely interest or principal payments. Investments in **non-U.S. securities** involve special risks not typically associated with domestic investments including currency risk, if not hedged - the risk that changes in exchange rates will affect the value of the fund's investments, as well as adverse political, social and economic developments. These risks often are magnified in **emerging markets**. These and other risk considerations such as **foreign currency** risk are described in more detail in the Shareholder Update section of the Fund's annual report at www.nuveen.com/NMAI-annual-report.
