

## Nuveen ESG Large-Cap Value ETF

Marketing communication | As of 31 Mar 2025

Effective 18 Jun 2024, Nazar Romanyak and Darren Tran joined Jim Campagna as portfolio managers of the Fund. This update did not impact the overall investment strategy. Effective 01 May 2024, the Fund's benchmark changed from TIAA ESG USA Large-Cap Value Index to Nuveen ESG USA Large-Cap Value Index. Both the fund objective and the index construction process remain the same.

### Average annualized total returns (%)

	Inception date	1 year	3 years	5 years	Since inception
Net Asset Value (NAV)	13 Dec 16	6.24	4.45	13.43	8.39
Market Price	13 Dec 16	6.39	4.42	13.48	8.39
Nuveen ESG USA Large-Cap Value Index		6.55	4.73	13.79	8.74
MSCI USA Value Index (GROSS)		7.87	6.93	15.81	9.10

Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns assume reinvestment of dividends and capital gains. Market price returns are based on the closing market price. For performance current to the most recent month-end visit [nuveen.com](https://nuveen.com).

Shares of ETFs are bought and sold at market price as opposed to net asset value. As a result, an investor may pay more than net asset value when buying and receive less than net asset value when selling. In addition, brokerage commissions will reduce returns. Fund shares are not individually redeemable directly with the Fund, but blocks of shares may be acquired from the Fund and tendered for redemption to the Fund by certain institutional investors in Creation Units.

### Calendar year returns (%)

	2017	2018	2019	2020	2021	2022	2023	2024	2025 YTD
Net Asset Value (NAV)	16.48	-4.45	26.76	1.88	23.36	-9.99	7.51	11.94	2.87
Market Price	15.67	-5.04	27.26	1.86	23.43	-10.05	7.58	11.94	2.84
Nuveen ESG USA Large-Cap Value Index	16.92	-4.16	27.28	2.24	23.82	-9.81	7.81	12.29	2.93
MSCI USA Value Index (GROSS)	15.37	-7.18	25.73	0.95	27.17	-6.24	9.24	14.34	2.91

### Current expense ratio (%)

Consumer Staples	11.08
Information Technology	9.46
Consumer Discretionary	5.85
Utilities	5.33
Communication Services	5.03
Energy	3.85
Real Estate	3.62
Materials	2.95

# NULV – Nuveen ESG Large-Cap Value ETF

As of 31 Mar 2025

## Fund description

The Fund employs a passive management (or “indexing”) approach, investing primarily in large-capitalization U.S. equity securities that exhibit overall value style characteristics and that satisfy certain environmental, social and governance (“ESG”) criteria. The Fund seeks to track the investments results, before fees and expenses, of the Nuveen ESG USA Large-Cap Value Index.

## Index description

The Nuveen ESG USA Large-Cap Value Index (the “Index”) is primarily composed of equity securities issued by large capitalization companies listed on U.S. exchanges. The Index uses a rules-based methodology that seeks to provide investment exposure that generally replicates that of large-cap value benchmarks through a portfolio of securities that adhere to predetermined ESG, controversial business involvement and low-carbon screening criteria. The Index is rebalanced on a quarterly basis.

## Fund highlights

- Core exposure to U.S. large-cap value stocks for investors who value ESG principles
- A tool for building a tactical equity allocation
- Intraday exchange-traded liquidity
- A transparent, tax-efficient\* and low-cost investment solution

## Fund facts

Intra-day Indicative Ticker	NULV.IV
NAV Ticker	NULV.NV
Primary Exchange	Cboe

## Index facts

Index Ticker	M2CXTNBR
Index Provider	MSCI

\* ETFs have generally low portfolio turnover and do not need to sell securities to meet shareholder redemptions, potentially reducing taxable gains.

## Important information on risk

Investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. This ETF seeks to generally track the investment results of an index; however the Fund may underperform, outperform or be more volatile than the referenced index. In addition, because the Index selects securities for inclusion based on **environmental, social, and governance (ESG)** criteria, the Fund may forgo some market opportunities available to funds that don't use these criteria. The value of **equity securities** may decline significantly over short or extended periods of time. **Value stocks** may not be fully recognized by the market and be undervalued. Because it invests primarily in **large-capitalization stocks**, the Fund may underperform funds that invest primarily in stocks of smaller capitalization companies during periods when the stocks of such companies are in favor. These and other risk considerations are described in detail in the Fund's prospectus. Responsible investing incorporates Environmental Social Governance (ESG) factors that may affect exposure to issuers, sectors, industries, limiting the type and number of investment opportunities available, which could result in excluding investments that perform well.

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or an investment strategy, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

MSCI ESG Quality Score (“Quality Score”) measures the ability of underlying holdings to manage key medium to long-term risks and opportunities arising from environmental, social, and governance factors. The Quality Score is calculated as the weighted average of the underlying holdings' ESG Scores. The Quality Score is provided on a 0-10 score, with 0 and 10 being the respective lowest and highest possible fund scores. MSCI rates underlying holdings according to their exposure to 37 industry specific ESG risks and their ability to manage those risks relative to peers. Carbon Intensity Score is measured in

tons CO2/\$M sales. Since companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks, this metric indicates a fund's exposure to potential climate change-related risks relative to other funds or a benchmark. To be included in MSCI Fund Metrics, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research, the fund's holdings date must be less than one year old, and the fund must have at least ten securities. Data sources: MSCI, Morningstar

## Glossary

**P/E ratio** of a stock is calculated by dividing the current price of the stock by its forecasted 12 months' earnings per share. The average of the price/earnings ratio of a fund is a weighted harmonic average of all the current P/E ratios (excluding negatives) of the stocks in the fund's portfolio. This should not be construed as a forecast of the Fund's performance. **Weighted average market capitalization** is the portfolio-weighted mean capitalizations of all equity securities.

**Nuveen ESG USA Large-Cap Value Index** is a custom index that is owned and calculated by MSCI, is based on the MSCI USA Value Index and aims to increase exposure to positive environmental, social and governance (ESG) factors and exhibit lower carbon exposure as compared to the MSCI USA Value Index.

**It is not possible to invest directly in an index.**

**Before investing, carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your financial professional or Nuveen at 800.257.8787 or visit nuveen.com.**
