

Nuveen Winslow Large-Cap Growth ESG ETF
Marketing communication | As of 30 Sep 2025

Table with 5 columns: Metric, Inception date, 1 year, 3 years, Since inception. Rows include Net Asset Value (NAV), Market Price, and Russell 1000 Growth Index.

Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost.

Table with 5 columns: Metric, 2022, 2023, 2024, 2025 YTD. Rows include Net Asset Value (NAV), Market Price, and Russell 1000 Growth Index.

Table with 2 columns: Metric, Value. Row: Total, 0.65.

Total annual fund operating expenses. See the Fund's prospectus for full information on expenses.

Table with 2 columns: Metric, Value. Rows: SEC 30-day yield (%), -0.27; Distribution frequency, Annually.

The SEC 30-day yield is computed under an SEC standardized formula.

Overall Morningstar Rating™
Category: 1024 Large Growth funds
NWLG ★★★★★
Morningstar ratings are based on historical risk-adjusted total returns, which are not indicative of future results.

MSCI ESG Quality Score
6.36 vs. 6.28 for the Morningstar Large Growth Category average
Higher ESG Score indicates stronger ESG practices and ability to manage material ESG issues relative to industry peers.

MSCI Carbon Intensity Score
25.73 vs. 51.74 for the Morningstar Large Growth Category average
Lower Carbon Intensity Score indicates a more favorable (lower) level of CO2 emissions per \$MM sales.

Table with 2 columns: Metric, Value. Rows include Total net assets, Number of positions, Weighted average market cap, P/E ratio, and a descriptive note about the data.

Table with 2 columns: Metric, Value. Rows include Top positions (NVIDIA Corp, Microsoft Corp, etc.) and a note: Positions subject to change.

Table with 3 columns: Sector, Fund net assets, Russell 1000 Growth Index. Rows include Information Technology, Communication Services, etc., and a Net row.

NWLG – Nuveen Winslow Large-Cap Growth ESG ETF

As of 30 Sep 2025

Fund description

An actively managed exchange traded fund that invests at least 80% of its net assets in equity securities of U.S. companies with market capitalization in excess of \$4 billion at the time of purchase, and demonstrates sustainable environmental, social and governance (ESG) characteristics.

THIS ETF IS DIFFERENT FROM TRADITIONAL ETFs

A traditional ETF tells the public what assets it holds each day. This ETF will not. This may create additional risks for your investment. For example: (i) You may have to pay more money to trade this ETF's shares. This ETF will provide less information to traders, who tend to charge more for trades when they have less information. (ii) The price you pay to buy ETF shares on an exchange may not match the value of the ETF's portfolio. The same is true when you sell shares. These price differences may be greater for this ETF compared to other ETFs because it provides less information to traders. (iii) These additional risks may be even greater in bad or uncertain market conditions. (iv) The ETF will publish on its website each day a Proxy Portfolio ("Proxy Portfolio") designed to help trading in shares of the ETF. While the Proxy Portfolio includes some of the ETF's holdings, it is not the ETF's actual portfolio. (v) The differences between this ETF and other ETFs may also have advantages. By keeping certain information about the ETF secret, this ETF may face less risk that other traders can predict or copy its investment strategies. This may improve the ETF's performance. If other traders are able to copy or predict the ETF's investment strategies, however, this may hurt the ETF's performance. **For additional information regarding the unique attributes and risks of this ETF, please refer to the Fund's prospectus and/or statement of additional information.**

Calvin Bohman 18 years industry experience

Important information on risk

Investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Because the Fund's Environmental Social Governance (ESG) investment strategy may exclude securities of certain issuers for nonfinancial reasons, the Fund may forgo some market opportunities available to funds that don't use an ESG investment strategy. Prices of equity securities may decline significantly over short or extended periods of time. Growth stocks tend to be more volatile than certain other types of stocks and their prices usually fluctuate more dramatically than the overall stock market. Non-U.S. investments involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These and other risk considerations, such as active management and growth stock risks, are described in detail in the Fund's prospectus. Responsible investing incorporates Environmental Social Governance (ESG) factors that may affect exposure to issuers, sectors, industries, limiting the type and number of investment opportunities available, which could result in excluding investments that perform well.

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or an investment strategy, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

For the period ended 30 September 2025, Morningstar rated this Fund for the overall, three-, five-, and 10-year periods (if applicable). The Fund received 4 and 4 stars among 1024 and 1024 Large Growth Funds, respectively. For the most current ratings, please visit nuveen.com.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star

Fund highlights

- Long-term capital appreciation potential
- Seeks quality companies with above-average earnings growth
- Assesses ESG and controversy inputs to provide an integrated, active growth approach to ESG investing

MSCI ESG Quality Score ("Quality Score") measures the ability of underlying holdings to manage key medium to long-term risks and opportunities arising from environmental, social, and governance factors. The Quality Score is calculated as the weighted average of the underlying holdings' ESG Scores. The Quality Score is provided on a 0-10 score, with 0 and 10 being the respective lowest and highest possible fund scores. MSCI rates underlying holdings according to their exposure to 37 industry specific ESG risks and their ability to manage those risks relative to peers. Carbon Intensity Score is measured in tons CO2/\$M sales. Since companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks, this metric indicates a fund's exposure to potential climate change-related risks relative to other funds or a benchmark. To be included in MSCI Fund Metrics, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research, the fund's holdings date must be less than one year old, and the fund must have at least ten securities. Data sources: MSCI, Morningstar

Glossary

P/E ratio of a stock is calculated by dividing the current price of the stock by its forecasted 12 months' earnings per share. The average of the price/earnings ratio of a fund is a weighted harmonic average of all the current P/E ratios (excluding negatives) of the stocks in the fund's portfolio. This should not be construed as a forecast of the Fund's performance. **Weighted average market capitalization** is the portfolio-weighted mean capitalizations of all equity securities.

Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values.

It is not possible to invest directly in an index.

Before investing, carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your financial professional or Nuveen at 800.257.8787 or visit nuveen.com.
