

A TIAA Company

## Additional ESG Disclosure

The present disclosure is applicable to **Nuveen Emerging Markets Impact Bond Fund**, **Nuveen U.S. Core Impact Bond Fund** and **Nuveen Global Core Impact Bond Fund**, all three sub-funds of Nuveen Global Investors Fund Plc, and thereby referred to as ‘the Funds’.

The Funds are classified as financial products with a sustainable investment objective as described in Article 9 SFDR. Accordingly, the Funds implement a set of binding sustainable criteria in their investment selection process which are detailed in the prospectus. In particular, when investing under the ESG criteria, as defined in the relevant fund’s investment policy, the Funds are restricted from investing in companies involved in certain business activities, based on available data on the level of revenues generated by the operations such activities. As of today, these restrictions are:

- Conventional weapon components & systems (above 10% or \$3B revenue)
- Controversial weapons, including cluster munitions, landmines, depleted uranium, nuclear weapons, and biochemical weapons (any revenue ineligible)
- Civilian firearms production (any revenue ineligible)
- Nuclear fuel enrichment or uranium mining (any revenue ineligible)
- Thermal coal production and power generation (above 30% revenue or 30% generation)
- Nuclear power (above 50% revenue)
- Tobacco production (above 10%)
- Gambling operations & support (above 10% or \$1B revenue)
- Alcohol production (above 10% or \$1B revenue)

Any company meeting any of these revenue levels would not be a permitted investment under the ESG criteria. Permitted companies are vetted against these revenue levels prior to investing and monitored periodically thereafter to ensure the Funds' continued compliance. If the revenues of a company included in the Funds' portfolios under the ESG criteria come to exceed any of the above revenue levels, the Funds' respective Investment teams will take reasonable measures to sell such security as soon as reasonably practicable, and the company will no longer be a permitted investment under the ESG criteria. A company that is not a permitted investment under the ESG criteria may be included in the portfolio if it issues an Impact eligible bond. The Fund sets stringent eligibility requirements for Impact bonds based on the security's use of proceeds which must be aligned with the Fund's sustainable investment objective. Please refer to the prospectus for additional information on Nuveen's Fixed Income Impact Framework.
