

Nuveen Variable Rate Preferred & Income Fund (NPFDF)

Marketing communication | As of 31 Mar 2025

- The Fund outperformed the NPFDF Blended Benchmark (the benchmark) during the quarter.
- Contributors included security selection, an overweight to \$1000 par preferred securities versus \$25 par preferreds, and a longer leverage-adjusted effective duration versus the benchmark.
- Security selection modestly detracted in the U.S. dollar-denominated contingent capital securities (USD CoCos) segment.

Portfolio review

The quarter was relatively void of headlines specific to the preferred securities market. For the bank sector, the largest issuer of preferreds, news was generally positive. Banks released fourth-quarter 2024 earnings that, on average, exceeded expectations, a trend that has spanned several quarters. In June 2024, all 31 participating banks passed the Federal Reserve's annual stress test and collectively held almost \$600 billion of excess capital. While the Trump administration stated a desire to scale back bank regulations, many prominent U.S. bank CEOs have urged regulators to refrain from changes because bank sector profitability has remained historically high under current regulations.

The Fed remained on hold during the quarter as policymakers paused to assess the impact of the Trump administration's aggressive economic agenda. After topping out in January, the 10-year Treasury yield fell to 4.23% by quarter end, reversing around half of fourth quarter's increase. The \$25 par preferred segment of the benchmark returned 0.61% for the quarter, well below the 1.44% and 2.05% returns of the \$1000 par preferreds and USD CoCos segments, respectively.

The Fund's leverage-adjusted effective duration ended the quarter at around 4.8 years, longer than the benchmark's duration of approximately 2.8 years.

Contributors

Security selection drove the Fund's relative outperformance, particularly within the insurance sector.

The Fund's overweight to \$1000 par preferred securities versus \$25 par preferreds also contributed.

In addition, the Fund's longer leverage-adjusted effective duration versus the benchmark, which increases its rate sensitivity, benefited relative performance as rates fell across the U.S. Treasury yield curve during the quarter.

Detractors

Security selection in the USD CoCo segment detracted modestly.

Nuveen Variable Rate Preferred & Income Fund (NPFD)

As of 31 Mar 2025

Average annualized total returns (%)

	Inception date	QTD	1 year	3 years	Since inception
Share price	15 Dec 21	5.72	16.08	1.63	-0.71
NAV	15 Dec 21	1.76	8.65	2.89	0.28

Performance data shown represents past performance and does not predict or guarantee future results. Current performance may be higher or lower than the data shown. NAV returns are net of fund expenses, and assume reinvestment of distributions.

Distribution information

Current Distribution (Monthly)	\$0.1675
Average Earnings/Share	\$0.0974
Average Earnings/Distribution Ratio	58.16%
Average UNII Per Share	-\$0.5784
Distribution Rate on NAV	10.11%
Distribution Rate on Market Price	10.71%

Distributions are currently estimated to include the following amounts from sources other than net investment income: 0% capital gains and 44% return of capital. If a distribution is estimated to include anything other than net investment income, the Fund provides a Section 19(a) notice of the best estimate of its distribution sources at that time which may be viewed at [nuveen.com/CEFDistributions](https://www.nuveen.com/CEFDistributions) or within the Fund's literature section under 19(a) notices. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. The distribution rate should not be confused with yield or performance.

Credit quality (%)

	% of portfolio
AAA	0.0%
AA	0.0%
A	8.0%
BBB	66.5%
BB	22.5%
B	0.3%
NR	2.1%
Cash and Equivalents	0.6%

Ratings shown are the highest rating given by one of the following national rating agencies: S&P, Moody's, Fitch, DBRS or AM Best. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Holdings designated NR are not rated by these national rating agencies and, where applicable, include net derivative positions.

Fund description

The Fund seeks to provide a high level of current income and total return by investing in primarily investment grade, variable rate preferred securities and other variable rate income-producing securities from high quality, highly regulated companies such as banks, utilities and insurance companies. All, or almost all, of the Fund's distributions of net investment income are expected to be treated as qualified dividend income (QDI) which is generally taxed at a lower rate than interest and ordinary dividend income, assuming holding period and certain other requirements are met.

The Fund may invest up to 20% of Managed Assets in contingent capital securities or contingent convertible securities (CoCos) and up to 15% in companies located in emerging market countries but will only invest in U.S. dollar denominated securities. More than 25% of Managed Assets will be invested in securities of companies in the financial services sector.

Portfolio management

Nuveen Asset Management, LLC is the subadvisor to the Fund and an affiliate of Nuveen, LLC.

All characteristics as a percentage of the fund's managed assets (total assets of the fund, minus the sum of its accrued liabilities other than fund liabilities incurred for the express purpose of creating leverage). Holdings and ratings are subject to change. Totals may not add up to 100% due to rounding.

Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Preferred securities** are subordinated to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk. **Debt or fixed income securities** such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, derivatives risk, liquidity risk, and income risk. As interest rates rise, bond prices fall. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Leverage** increases return volatility and magnifies the Fund's potential return and its risks; there is no guarantee a fund's leverage strategy will be successful. Certain types of preferred, hybrid or debt securities with special loss absorption provisions, such as **contingent capital securities** (CoCos), may be or become so subordinated that they present risks equivalent to, or in some cases even greater than, the same company's common stock. These loss absorption features work to the benefit of the security issuer, not the investor (this fund). These and other risk considerations, including the Fund's **limited term** and **concentration risk**, are described in more detail in the Shareholder Update section of the Fund's annual report at www.nuveen.com/NPFD-annual-report.

Average earnings per share and **average undistributed net investment income (UNII) per share** are estimates, using an average of the last three months, except for preferred securities funds, mortgage-backed securities funds and floating rate funds, which use an average of the last six months.

Distribution Rate at market price and NAV is calculated by annualizing the most recent declared regular distribution and dividing by the fund's market price or NAV, respectively. Special distributions, including special capital gains distributions, are not included in the calculation.

Glossary

The **NPFD Blended Benchmark** consists of 80% ICE Variable Rate Preferred & Hybrid Securities Index and 20% ICE USD Contingent Capital Index. The **ICE Variable Rate Preferred & Hybrid Securities Index** is designed to measure the performance of floating- and variable-rate investment grade and below investment grade USD-denominated preferred stock and hybrid debt publicly issued by corporations in the U.S. domestic market. The **ICE USD Contingent Capital Index (CDLR)** is designed to track the performance of USD-denominated contingent capital debt publicly issued in the major domestic and Eurobond markets, including investment grade and below investment grade issues. **It is not possible to invest directly in an index.**
