#### TALK WITH US ABOUT YOUR GOALS

Understanding what our clients want and how to tailor portfolios that meet their needs is second nature to us. Working with financial professionals, clients can talk to our portfolio management team about investment goals and objectives.

**2**

#### COLLABORATE TO CREATE YOUR PORTFOLIO

Consult with us to review individual bond holdings, and we can recommend action steps based on particular objectives. Clients share any preferences for customization. We build, monitor and maintain the portfolio according to our high standards.

**3**

#### WE'RE NOT ALONG FOR THE RIDE; WE'RE DRIVING RESULTS

As an account is being invested, we're here to provide regular updates. Once invested, the portfolio is optimized for rebalancing and tax loss harvesting as applicable. And when needed, a member of our team is available to discuss the account, holdings and performance.

The Taxable Ladder strategies are new strategies with limited history that are newly offered to the public. Nuveen has not previously managed these strategies and there is no guarantee the strategies will meet their

investment objectives. Please note that Nuveen Laddered Strategies may not lend themselves to certain types of customizations including, but not limited to: sector restrictions, requests to replace individual bonds, and certain client trading such as tax sales. These strategies do not utilize the opportunistic and more active trading approach found in certain other Nuveen bond strategies. The laddered bonds will typically be held to maturity in the absence of material credit events, contributions/withdrawals and calls. Initially, Nuveen will typically purchase individual bonds that are given equal weight, with differing maturities across the specified strategy maturity range. The maturity range is typically segmented into 1 year ranges ("rungs"). Nuveen will typically purchase 1-2 bonds in each rung creating a "ladder" of individual bonds. As bonds mature (or are called) and cash is generated in the account, Nuveen will purchase additional bonds in the longest available rung within the strategy's bond maturity range.

There is no assurance that an investment will provide positive performance over any period of time. Investing entails risks, including the possible loss of principal. **Past performance is no guarantee of future results.** Individual investor results will vary. It is important to review investment objectives, risk tolerance, tax liability and liquidity needs before choosing an investment style or manager.

All investments carry a certain degree of risk and it is important to review investment objectives, risk tolerance, tax liability and liquidity needs before choosing an investment style or manager. Debt or fixed income securities are subject to credit risk and interest rates risk. The value of and income generated by debt securities will decrease or increase based on changes in market interest rates. Credit risk refers to an issuer's ability to make interest and principal payments when due. Bonds may be callable, which may increase the interest rate risk exposure in the portfolios. Upon call, a client may be confronted with a less favorable interest rate environment than the one that existed when the original bond was purchased.
