NAM is the successor firm to (1) the portfolio management business of Nuveen Asset Management and (2) the long-term asset management of FAF Advisors, Inc. following an internal reorganization of Nuveen Asset Management and Nuveen Investments, Inc.'s acquisition of the long-term asset management of FAF Advisors, Inc. from U.S. Bank effective on 31 Dec 2010. - The composite consists of fully discretionary, retail separately managed accounts and a seed account managed in a Large Cap Core style. Nuveen Asset Management, LLC's Large Cap Core strategy seeks to outperform the broad benchmark over a full market cycle, while generating comparable total return characteristics relative to the Russell 1000 Index.

- The composite performance has been achieved at Nuveen Asset Management.

It is a subset of the Russell 3000® Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 represents approximately 92% of the U.S. market.
- The composite net of fees returns are calculated by deducting 1/12th of a model fee of 3.00%, which NAM reasonably believes is the maximum applicable fee, from the monthly "pure" gross of fee returns.
- Results are calculated in U.S. dollars.
- Interest income and dividends on foreign securities are subject to the corresponding foreign countries' withholding taxes. Capital gains are not subject to country taxation.
- The three-year annualized standard deviation measures the variability of the composite and the benchmark over the preceding 36-month period and is calculated using gross returns.
