

Nuveen Real Asset Income and Growth Fund (JRI)

Marketing communication | 4Q 2024 | As of 31 Dec 2024

Effective 11 Feb 2025, James Kim joined Benjamin Kerl, Brenda Langenfeld, Tryg Sarstrand, Noah Hauser and Jean Lin as portfolio managers of the Fund. Jean Lin announced her retirement and will remain on the Fund until 01 Apr 2025. These updates are not expected to impact the overall investment strategy.

Fund description

The Fund seeks to deliver a high level of current income and long-term capital appreciation by investing in real asset-related companies across the world and the capital structure, including common stocks, preferred securities, and debt. Real asset-related companies include those engaged in owning, operating, or developing infrastructure projects, facilities, and services, as well as REITs.

Up to 40% of its assets may be debt securities, all of which may be rated below investment grade, though no more than 10% of its assets may be invested in securities rated CCC+/Caa1 or lower at any time. Non-U.S. exposure represents 25% to 75% of the Fund's managed assets. The Fund uses leverage, and to a limited extent may also opportunistically write call options, seeking to enhance its risk-adjusted total returns over time.

1 Total Investment Exposure is the total of the Fund's managed assets plus any additional economic exposure the Fund has due to its investments in certain securities.

2 Effective leverage is the Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative investments in the Fund's portfolio that increase the Fund's investment exposure. Regulatory leverage consists of preferred shares issued by or borrowings of a fund. Both of these are part of a fund's capital structure. Regulatory leverage is subject to asset coverage limits set in the Investment Company Act of 1940. For more information, see Understanding Leverage on www.nuveen.com/cef.

3 Debt characteristics (duration, maturity, bond price) are relative to the percentage of the portfolio invested in debt securities.

Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Concentration** in specific sectors may involve greater risk and volatility than more diversified investments: **real estate investments** may suffer due to economic downturns and changes in real estate values, rents, property taxes, interest rates and tax laws; infrastructure-related securities may face adverse economic, regulatory, political, and legal changes. Prices of **equity securities** may decline significantly over short or extended periods of time. **Debt or fixed income securities** such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, derivatives risk, liquidity risk, and income risk. As interest rates rise, bond prices fall. **Leverage increases** return volatility and magnifies the Fund's potential return and its risks; there is no guarantee a fund's leverage strategy will be successful. For these and other risks such as **foreign investment risk**, see the Fund's web page at www.nuveen.com/JRI.

¹ **Distribution Rate** at market price and NAV is calculated by annualizing the most recent declared regular

distribution and dividing by the fund's market price or NAV, respectively. Special distributions, including special capital gains distributions, are not included in the calculation.

² For the percentage of the portfolio in debt, preferred and other hybrid securities, including CoCos (if any). Percentages reflect the percentage of the Fund's investment exposure callable in the timeframe relative to the "as of" date shown. The "Next 12 months" figure (if shown) includes investments that are currently callable, as well as callable in the next 12 months. Securities subject to call may not be called.

Glossary

Average Coupon is the average coupon rate, or amount of interest paid as expressed by a percentage, of all fixed-income investments in the Fund's portfolio. **Leverage Adjusted Effective Duration** is the Fund's average effective duration adjusted for the impact of the Fund's utilization of leverage in the form of senior securities as defined by Section 18 of the Investment Company Act of 1940. Funds that utilize leverage in the form of senior securities will have a leverage-adjusted effective duration that is longer than its baseline effective duration.
