

## Nuveen Municipal Value Fund, Inc. (NUV)

Marketing communication | 4Q 2024 | As of 31 Dec 2024

### Fund description

The Fund seeks to provide current income exempt from regular federal income tax by investing in an actively managed portfolio tax-exempt municipal securities.

At least 80% of its managed assets are rated investment grade; up to 10% may be rated below B-/B3 at the time of purchase or, if unrated, judged to be of comparable quality by the Fund's portfolio team. The Fund may invest in inverse floating rate municipal securities, also known as tender option bonds. The Fund's use of tender option bonds to more efficiently implement its investment strategy may create up to 10% effective leverage.

### Calendar Year Returns (%)

### Average Annualized Total Returns (%)

Performance data shown represents past performance and does not predict or guarantee future results. Current performance may be higher or lower than the data shown. NAV returns are net of fund expenses, and assume reinvestment of distributions.

### Capital Structure<sup>1</sup>

	Common Shares	Total Fund
Management Fees	0.45%	0.45%
Other Expenses	0.08%	0.08%
<b>Total</b>	<b>0.53%</b>	<b>0.53%</b>

See the Fund's Annual Report for full information on expenses.

<sup>1</sup> Total Investment Exposure is the total of the Fund's managed assets plus any additional economic exposure the Fund has due to its investments in certain securities.

<sup>2</sup> Effective leverage is the Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative investments in the Fund's portfolio that increase the Fund's investment exposure. Regulatory leverage consists of preferred shares issued by or borrowings of a fund. Both of these are part of a fund's capital structure. Regulatory leverage is subject to asset coverage limits set in the Investment Company Act of 1940. For more information, see Understanding Leverage on [www.nuveen.com/cef](http://www.nuveen.com/cef).

<sup>3</sup> All characteristics are asset-weighted using the current market value of investments held in the portfolio as well as the full amount and exposure of bonds held in a tender option bond (TOB) trust, even though the fund owns only the residual inverse floater in its portfolio. Holdings and ratings are subject to change. Totals may not add up to 100% due to rounding.

<sup>4</sup> Debt characteristics (duration, maturity, bond price) are relative to the percentage of the portfolio invested in debt securities.

## Share Price and NAV History (\$)

Data reflects performance over the previous 12 months

Past performance is no guarantee of future results.

## Portfolio Management

Nuveen Asset Management, LLC is the subadviser to the Fund and an affiliate of Nuveen, LLC.

### Credit Quality (%)<sup>3</sup>

U.S. Guaranteed	2.0%
AAA	9.9%
AA	42.4%
A	28.3%
BBB	8.7%
BB	1.6%
B	1.0%
Not Rated	6.0%

Ratings shown are the highest rating given by one of the following national rating agencies: S&P, Moody's or Fitch. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Holdings designated NR are not rated by these national rating agencies.

### Call Exposure (%)<sup>4</sup>

Next 12 Months	8.7%
13-24 Months	5.1%
25-36 Months	6.9%
37-48 Months	11.6%
49-60 Months	3.1%

## Key Information Regarding Distributions<sup>1, 2</sup>

Current Distribution (Monthly)	\$0.0325
Average Earnings/Share	\$0.0292
Average Earnings/Distribution Ratio	89.84%
Average UNII Per Share	\$0.0123
Distribution Rate on NAV	4.20%
Distribution Rate on Market Price	4.54%

## Total Distributions Paid Per Share

YTD (Declared)	\$0.3575
Inception to Date (Declared)	\$19.8359

Distribution sources may include net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the Fund provides a notice of the best estimate of its distribution sources at that time which may be viewed at [nuveen.com/CEFDistributions](http://nuveen.com/CEFDistributions). These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate.

## Top 5 Holdings

	% of Portfolio
Buckeye Tobacco Settlement Financing Authority	2.0%
New Jersey Transportation Trust Fund Authority	1.3%
Salt River Project Agricultural Improvement & Power District	1.2%
County Of Broward Fl Tourist Development Tax Revenue	1.1%
Commonwealth Of Massachusetts	1.1%

Holdings may vary and are subject to change without notice.

## Top 5 Sectors<sup>3</sup>

	% of Portfolio
Tax Obligation/Limited	30.5%
Transportation	21.4%
Utilities	16.8%
Tax Obligation/General	12.2%
Health Care	9.4%

## Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Debt or fixed income securities** such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, derivatives risk, liquidity risk, and income risk. As interest rates rise, bond prices fall. These and other risk considerations such as **tax risk** are described in more detail on the Fund's web page at [www.nuveen.com/NUV](http://www.nuveen.com/NUV).

<sup>1</sup> **Average earnings per share** and **average undistributed net investment income (UNII) per share** are estimates, using an average of the last three months, except for preferred securities funds, mortgage-backed securities funds and floating rate funds, which use an average of the last six months.

<sup>2</sup> **Distribution Rate** at market price and NAV is calculated by annualizing the most recent declared regular distribution and dividing by the fund's market price or NAV, respectively. Special distributions, including special capital gains distributions, are not included in the calculation.

<sup>3</sup> All characteristics are asset-weighted using the current market value of investments held in the portfolio as well as the full amount and exposure of bonds held in a tender option bond (TOB) trust, even though the fund owns only the residual inverse floater in its portfolio. Holdings and ratings are subject to change. Totals may not add up to 100% due to rounding.

<sup>4</sup> For the percentage of the portfolio in debt, preferred and other hybrid securities, including CoCos (if any). Percentages reflect the percentage of the Fund's investment exposure callable in the timeframe relative to the "as of" date shown. The "Next 12 months" figure (if shown) includes investments that are currently callable, as well as callable in the next 12 months. Securities subject to call may not be called.

## Glossary

**Average Coupon** is the average coupon rate, or amount of interest paid as expressed by a percentage, of all fixed-income investments in the Fund's portfolio. **Effective Duration** (sometimes called option-adjusted duration, or "OAD") is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by changes in market interest rates. This measures the responsiveness of a bond's price to market interest rate changes and illustrates the fact that the embedded option will also affect the bond's price. **Effective Maturity** is the weighted average of the effective maturity dates of the fixed-income securities in the Fund's holdings. A bond's effective maturity takes into account the possibility that it may be called by the issuer before its stated maturity date. In this case, the bond trades as though it had a shorter maturity than its stated maturity.
