Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit [nuveen.com/global](https://nuveen.com/global). Performance shown for benchmark since inception is as of the Fund's oldest share class. The base currency of the Fund is USD. Returns may increase or decrease as a result of currency and exchange rate fluctuations between the base currency of the Fund and the currency in which an investor subscribes.

The maximum sales charge for Class A & C shares is 5.00%. All other share classes have no sales charge.

### Expense ratios (%)

Class A \$ accumulating	1.60
Class C \$ accumulating	2.10
Class I \$ accumulating	1.10
Class P \$ accumulating	0.80

Expense ratios may include discretionary reimbursements whereby administrative and operating expenses are capped at the sole discretion of the Investment Manager. Expense ratios would increase if these expenses were deducted from the Fund.

### Distribution frequency

Semi-Annually

Distribution yield is the ratio of the most recent distribution paid by the Fund divided by the market price of the Fund as of the date of the calculation, multiplied by the number of distribution payments made in a year.

### Overall Morningstar Rating™

Category: 595 Property - Indirect Global funds

CLASS I \$ acc. ★★★★★

Morningstar ratings may vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

## Important information on risk

Investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. The **real estate industry** is greatly affected by economic downturns or by changes in real estate values, rents, property taxes, interest rates, tax treatment, regulations, or the legal structure of the REIT. Prices of **equity securities** may decline significantly over short or extended periods of time. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in **emerging markets**. A complete description of the risks of investing in the Fund can be found in the Key Investment Information Document(s) (KIID) and the Prospectus.

Responsible investing incorporates Environmental Social Governance (ESG) factors that may affect exposure to issuers, sectors, industries, limiting the type and number of investment opportunities available, which could result in excluding investments that perform well.

ESG integration is the consideration of financially material ESG factors into investment research in support of portfolio management for actively managed strategies. Financial materiality of ESG factors varies by asset class and investment strategy. Applicability of ESG factors may differ across investment strategies. ESG factors are among many factors considered in evaluating an investment decision, and unless otherwise stated in the relevant offering memorandum or prospectus, do not alter the investment guidelines, strategy or objectives.

**For the period ended 30 Nov 2024, Morningstar rated this Fund's I shares, for the overall, three-, five-, and 10-year periods (if applicable). The Class I USD shares received 5, 4, and 5 stars among 595, 595, and 479 EAA Fund Property - Indirect Global Funds, respectively. These ratings are for Class I USD shares only; other classes may have different performance characteristics. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower.**

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2023 Morningstar, Inc.
