Summary

People often assume that the information on annual Social Security statements are all they need to know about their expected benefits. But statements provide a very limited view. In fact, most people don’t realize the full impact of the choices they make or the alternatives available to them until it’s too late. That knowledge gap represents a powerful opportunity for financial advisors.

By proactively sharing insight about this foundational component of retirement income – including the key considerations for a collection strategy that aligns with an individual’s overall financial goals – advisors can engage new audiences and deepen relationships with existing clients.

It gives me a natural way to ask for client referrals.

Information that most pre-retirees don’t know, but should.

I feel better positioned to be a one-stop shop for retirement planning.
