

Nuveen New York Municipal Value Fund (NNY)

3Q 2021 | As of 30 Sep 2021

Fund description

The Fund seeks to provide current income exempt from regular federal, and New York State and New York City income tax and to enhance portfolio value.

The Fund invests in municipal securities that are exempt from federal, New York state, and New York City income taxes. The Fund invests at least 80% of its managed assets in municipal securities rated investment grade at the time of investment, or, if they are unrated, are judged by the manager to be of comparable quality. The Fund may invest up to 20% of its managed assets in municipal securities rated below investment quality or judged by the manager to be of comparable quality, of which up to 10% of its managed assets may be rated below B-/B3 or of comparable quality. The Fund may invest in inverse floating rate municipal securities, also known as tender option bonds. The Fund's use of tender option bonds to more efficiently implement its investment strategy may create up to 10% effective leverage.

1 Average earnings per share and average undistributed net investment income (UNII) per share are estimates, using an average of the last three months, except for preferred securities funds, mortgage-backed securities funds and floating rate funds, which use an average of the last six months.

2 Distribution Rates represent the latest declared regular distribution, annualized, relative to the market price and NAV. Special distributions, including special capital gains distributions, are not included in the calculation.

3 Percent allocations, calculations, and averages reflect the Fund's full investment exposure, including the full value of bonds held in tender option bond trusts that have issued residual inverse floating rate securities that the Fund holds.

4 For the percentage of the portfolio in debt, preferred and other hybrid securities, including CoCos (if any). Percentages reflect the percentage of the Fund's investment exposure callable in the timeframe relative to the "as of" date shown. The "Next 12 months" figure (if shown) includes investments that are currently callable, as well as callable in the next 12 months. Securities subject to call may not be called.

Glossary

Average Coupon is the average coupon rate, or amount of interest paid as expressed by a percentage, of all fixed-income investments in the Fund's portfolio. **Effective Duration** (sometimes called option-adjusted duration, or "OAD") is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by changes in market interest rates. This measures the responsiveness of a

bond's price to market interest rate changes and illustrates the fact that the embedded option will also affect the bond's price. **Effective Maturity** is the weighted average of the effective maturity dates of the fixed-income securities in the Fund's holdings. A bond's effective maturity takes into account the possibility that it may be called by the issuer before its stated maturity date. In this case, the bond trades as though it had a shorter maturity than its stated maturity.

A word on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Debt or fixed income securities** such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, derivatives risk, liquidity risk, and income risk. As interest rates rise, bond prices fall. **State concentration** makes the Fund more susceptible to local adverse economic, political, or regulatory changes affecting municipal bond issuers. These and other risk considerations such as **tax risk** are described in more detail on the Fund's web page at www.nuveen.com/NNY
