Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit nuveen.com/global. Performance shown for benchmark since inception is as of the Fund's oldest share class. The base currency of the Fund is USD. Returns may increase or decrease as a result of currency and exchange rate fluctuations between the base currency of the Fund and the currency in which an investor subscribes.

The maximum sales charge for Class A & C shares is 5.00%. All other share classes have no sales charge.

Expense ratios (%)

Class I \$ distributing	1.00
Class A € accumulating	1.50
Class P £ accumulating	0.85

Expense ratios may include discretionary reimbursements whereby administrative and operating expenses are capped at the sole discretion of the Investment Manager. Expense ratios would increase if these expenses were deducted from the Fund.

Distribution yield (%)

Class I \$ distributing	0.64
-------------------------	------

Distribution frequency

Semi-Annually

Distribution yield is the ratio of the most recent distribution paid by the Fund divided by the market price of the Fund as of the date of the calculation, multiplied by the number of distribution payments made in a year.

Important information on risk

Investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Dividends are not guaranteed. Prices of equity securities may decline significantly over short or extended periods of time. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in **emerging markets**. A complete description of the risks of investing in the Fund can be found in the Key Investor Information Document(s) (KIIDs) and the Prospectus.

This document does not constitute an offer or solicitation to invest in the Fund and it is intended that this document be circulated only to persons to whom it may lawfully be distributed in consultation with their professional legal, tax, and financial professionals as to the best interest of any investment in light of their particular circumstances and applicable citizenship, residence or domicile. Persons who do not fall within such description may not act upon the information contained herein. Any entity that forwards this material to other parties takes responsibility for ensuring compliance with local laws in connection with its distribution, and in particular any applicable financial promotion rules.

For the period ended 28 Feb 2025, Morningstar rated this Fund's I shares, for the overall, three-, five-, and 10-year periods (if applicable). The Class I USD shares received 4, 4, 3, and 4 stars among 1111, 1111, 932, and 575 EAA Fund Global Equity Income Funds, respectively. These ratings are for Class I USD shares only; other classes may have different performance characteristics. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2023 Morningstar, Inc.
