

Nuveen Multi-Asset Income Fund (NMAI)

Marketing communication | As of 30 Jun 2025

- The Fund underperformed the NMAI Blended Benchmark (50% MSCI ACWI and 50% Bloomberg U.S. Corporate High Yield Bond Index) for the quarter.
- Within equities, both U.S. and non-U.S. stocks posted strong returns with the U.S. modestly underperforming the non-U.S. stocks. Within the U.S., large-cap growth stocks outperformed large-cap value stocks. Within public real assets, global infrastructure stocks outperformed U.S. real estate investment trusts (REITs), while both underperformed capitalization-weighted global equities.
- The U.S. Treasury yield curve steepened while credit spreads tightened, resulting in high yield credit outperforming core bonds. Longer-duration fixed income assets underperformed shorter-duration assets of similar credit rating.

Portfolio review

Early in the quarter, we increased the Fund's exposure to dividend growth stocks in the U.S. to take advantage of the selloff following the Liberation Day tariff announcement. Around the same time, we also began to wind down the call overwriting overlay in the Fund.

Toward the end of the quarter, we repositioned the portfolio to reduce the Fund's exposure to public real assets – both U.S.

REITs and global infrastructure stocks – and to emerging markets equities, while increasing the Fund's exposure to core U.S. and international developed market equities. We also adjusted the Fund's fixed income posture by reducing its allocation to floating-rate loans, preferred securities and mortgage-backed securities (MBS), while increasing the allocation to core bonds and high yield bonds.

Contributors

Within equities, the positive contributors to the Fund's relative performance were led by security selection within global equities and U.S. large-cap value equities.

Within fixed income, the Fund benefited from positive security selection within preferred securities.

Detractors

Within equities, the Fund's allocation to U.S. REITs and U.S. large-cap value equities were the primary detractors from relative performance as they both underperformed cap-weighted global equities. Security selection within global infrastructure stocks also detracted from relative performance.

The main detractors within fixed income were the Fund's allocation to Treasury inflation-protected securities (TIPS) and MBS, as they both underperformed high yield credit.

Nuveen Multi-Asset Income Fund (NMAI)

As of 30 Jun 2025

Average annualized total returns (%)

	Inception date	QTD	1 year	3 years	Since inception
Share price	22 Nov 21	6.12	14.06	13.17	0.62
NAV	22 Nov 21	6.13	12.86	9.58	1.58

Performance data shown represents past performance and does not predict or guarantee future results. Current performance may be higher or lower than the data shown. NAV returns are net of fund expenses, and assume reinvestment of distributions.

Distribution information

Current Distribution (Monthly)	\$0.1260
Distribution Rate on NAV	10.94%
Distribution Rate on Market Price	11.97%

Distributions are currently estimated to include the following amounts from sources other than net investment income: 0% capital gains and 61% return of capital. If a distribution is estimated to include anything other than net investment income, the Fund provides a Section 19(a) notice of the best estimate of its distribution sources at that time which may be viewed at [nuveen.com/CEFDistributions](https://www.nuveen.com/CEFDistributions) or within the Fund's literature section under 19(a) notices. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. The distribution rate should not be confused with yield or performance.

Credit quality (%)

	% of portfolio
AAA	4.3%
AA	25.4%
A	2.6%
BBB	16.3%
BB	27.1%
B	20.4%
CCC	2.5%
Not Rated	1.3%

Ratings shown are given by one of the following national rating agencies: S&P, Moody's or Fitch. Credit ratings are subject to change. If there are multiple ratings for a security, the lowest rating is used unless ratings are provided by all three agencies, in which case the middle rating is used. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Holdings designated NR are not rated by these national rating agencies and, where applicable, include net derivative positions.

Fund description

The Fund's investment objective is to provide attractive total return through high current income and capital appreciation.

The Fund dynamically invests in a portfolio of equity and debt securities of issuers located around the world. This dynamic investment strategy uses a risk-based framework in which any amount can be allocated to an asset-class at any time. The Fund may invest in equity and debt securities of any type without limit. The relative allocations of the Fund's managed assets for investment between equity and debt securities, and relative allocations to the different types of equity and income strategies, will vary from time to time, consistent with the Fund's investment objective. The Fund uses leverage.

Portfolio management

Nuveen Asset Management LLC, Teachers Advisors, LLC, and Winslow Capital Management, LLC are subadvisers to the Fund and affiliates of Nuveen, LLC.

All characteristics as a percentage of the fund's managed assets (total assets of the fund, minus the sum of its accrued liabilities other than fund liabilities incurred for the express purpose of creating leverage). Holdings and ratings are subject to change. Totals may not add up to 100% due to rounding.

Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Allocation Risk.** The Fund's ability to achieve its investment objective depends upon the Fund's sub-adviser, Nuveen Asset Management's skill in determining the Fund's allocation to different sub-advisers and strategies. There is the risk that Nuveen Asset Management's evaluations and assumptions used in making such allocations may be incorrect. **Leverage** increases return volatility and magnifies the Fund's potential return and its risks; there is no guarantee a fund's leverage strategy will be successful. **Common stocks** have experienced significantly more volatility in returns and may significantly underperform relative to debt securities during certain periods. **Preferred securities** are subordinated to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk. Issuers of **debt instruments** in which the Fund may invest may default on their obligations to pay principal interest when due. The Fund is subject to **interest rate risk**; as interest rates rise, bond prices fall. Investments of **below investment grade** quality are regarded as having speculative characteristics with respect to the issuer's capacity to pay dividends or interest and repay principal, and may be subject to higher price volatility and default risk than investment grade investments of comparable terms and duration. Lower credit debt securities may be more likely to fail to make timely interest or principal payments. Investments in **non-U.S. securities** involve special risks not

typically associated with domestic investments including currency risk, if not hedged - the risk that changes in exchange rates will affect the value of the fund's investments, as well as adverse political, social and economic developments. These risks often are magnified in **emerging markets**. These and other risk considerations such as **foreign currency** risk are described in more detail in the Shareholder Update section of the Fund's annual report at www.nuveen.com/NMAI-annual-report.

Distribution Rate at market price and NAV is calculated by annualizing the most recent declared regular distribution and dividing by the fund's market price or NAV, respectively. Special distributions, including special capital gains distributions, are not included in the calculation.

The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her financial professional.

Glossary

The **NMAI Blended Benchmark** consists of 50% MSCI ACWI Index (Net) and 50% Bloomberg U.S. Corporate High Yield Bond Index. The **MSCI ACWI Index (Net)** is designed to measure the performance of large and mid-cap stocks across 23 developed and 25 emerging markets. The **Bloomberg U.S. Corporate High Yield Bond Index** is designed to measure the performance of the USD-denominated, fixed-rate corporate high yield bond market. **It is not possible to invest directly in an index.**
