

# Nuveen Variable Rate Preferred & Income Fund (NPFDF)

Marketing communication | As of 30 Jun 2025

- The Fund outperformed the NPFDF Blended Benchmark (the benchmark) during the quarter.
- Contributors included security selection, yield curve positioning, an underweight to \$25 par preferred securities and a corresponding overweight to \$1000 par preferred securities.
- The Fund had no meaningful detractors relative to the benchmark during the quarter.

## Portfolio review

While global financial markets were roiled by geopolitical, tariff and trade war-related headlines during the quarter, they ultimately demonstrated amazing resiliency. In the combined preferred securities and U.S. dollar-denominated contingent capital securities (USD CoCos) market, news was mostly positive. Banks, the largest issuer of preferreds and USD CoCos, released first-quarter 2025 earnings results that generally exceeded expectations. The Federal Reserve (Fed) posted annual stress test results in June showing that all 22 participating banks passed and demonstrated the capacity to absorb more than \$550 billion of losses, while still retaining the ability to lend to households and businesses under dire economic conditions. Late in the quarter, the Fed also released the first wave of long-discussed bank regulatory reforms, which do not appear to alter the strong fundamental credit story underlying the U.S. bank sector.

The Fed held rates steady during the quarter as policymakers closely monitored economic data for potential impacts from trade policies. U.S. Treasury yields remained volatile, but the

10-year Treasury ultimately ended close to flat for the quarter at 4.24%, masking a sharp increase amid ongoing fiscal uncertainty, followed by a decline as concerns eased. Meanwhile, short to intermediate rates fell, while rates rose in the 30-year segment of the yield curve.

The \$25 par preferred segment of the benchmark returned 0.4% for the quarter, well below the 2.7% and 2.8% returns of the \$1000 par preferreds and USD CoCos segments, respectively. While the option-adjusted spread (OAS) of the \$25 par preferred segment widened, the OAS of the other two segments narrowed during the quarter. In addition to the decrease in OAS, the performance of the \$1000 par preferred and USD CoCo segments also benefited from greater duration exposure in the short to intermediate segments of the yield curve, where rates fell rather meaningfully.

The Fund's leverage-adjusted effective duration ended the quarter at around 5.1 years, longer than the benchmark's duration of approximately 2.8 years.

## Contributors

Security selection helped drive the Fund's relative outperformance, notably within its bank sector allocation. Selection across coupon structures, denominations and its USD CoCo allocation also contributed, but to a lesser degree.

Underweights to \$25 par preferreds securities and a corresponding overweight to \$1000 par preferreds modestly aided relative results.

## Detractors

The Fund had no meaningful detractors relative to the benchmark during the quarter.

# Nuveen Variable Rate Preferred & Income Fund (NPFD)

As of 30 Jun 2025

## Average annualized total returns (%)

	Inception date	QTD	1 year	3 years	Since inception
Share price	15 Dec 21	5.46	16.61	10.59	0.85
NAV	15 Dec 21	3.24	10.20	8.37	1.17

Performance data shown represents past performance and does not predict or guarantee future results. Current performance may be higher or lower than the data shown. NAV returns are net of fund expenses, and assume reinvestment of distributions.

## Distribution information

Current Distribution (Monthly)	\$0.1675
Average Earnings/Share	\$0.1026
Average Earnings/Distribution Ratio	61.26%
Average UNII Per Share	-\$0.7800
Distribution Rate on NAV	10.04%
Distribution Rate on Market Price	10.43%

Distributions are currently estimated to include the following amounts from sources other than net investment income: 0% capital gains and 43% return of capital. If a distribution is estimated to include anything other than net investment income, the Fund provides a Section 19(a) notice of the best estimate of its distribution sources at that time which may be viewed at [nuveen.com/CEFDistributions](http://nuveen.com/CEFDistributions) or within the Fund's literature section under 19(a) notices. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. The distribution rate should not be confused with yield or performance.

## Credit quality (%)

	% of portfolio
AAA	0.0%
AA	0.0%
A	9.2%
BBB	65.4%
BB	22.4%
B	0.5%
NR	2.1%
Cash and Equivalents	0.5%

Ratings shown are the highest rating given by one of the following national rating agencies: S&P, Moody's, Fitch, DBRS or AM Best. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Holdings designated NR are not rated by these national rating agencies and, where applicable, include net derivative positions.

## Fund description

The Fund seeks to provide a high level of current income and total return by investing in primarily investment grade, variable rate preferred securities and other variable rate income-producing securities from high quality, highly regulated companies such as banks, utilities and insurance companies. All, or almost all, of the Fund's distributions of net investment income are expected to be treated as qualified dividend income (QDI) which is generally taxed at a lower rate than interest and ordinary dividend income, assuming holding period and certain other requirements are met.

The Fund may invest up to 20% of Managed Assets in contingent capital securities or contingent convertible securities (CoCos) and up to 15% in companies located in emerging market countries but will only invest in U.S. dollar denominated securities. More than 25% of Managed Assets will be invested in securities of companies in the financial services sector.

## Portfolio management

Nuveen Asset Management, LLC is the subadvisor to the Fund and an affiliate of Nuveen, LLC.

All characteristics as a percentage of the fund's managed assets (total assets of the fund, minus the sum of its accrued liabilities other than fund liabilities incurred for the express purpose of creating leverage). Holdings and ratings are subject to change. Totals may not add up to 100% due to rounding.

## Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Preferred securities** are subordinated to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk. **Debt or fixed income securities** such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, derivatives risk, liquidity risk, and income risk. As interest rates rise, bond prices fall. **Lower credit** debt securities may be more likely to fail to make timely interest or principal payments. **Leverage** increases return volatility and magnifies the Fund's potential return and its risks; there is no guarantee a fund's leverage strategy will be successful. Certain types of preferred, hybrid or debt securities with special loss absorption provisions, such as **contingent capital securities** (CoCos), may be or become so subordinated that they present risks equivalent to, or in some cases even greater than, the same company's common stock. These loss absorption features work to the benefit of the security issuer, not the investor (this fund). These and other risk considerations, including the Fund's **limited term** and **concentration risk**, are described in more detail in the Shareholder Update section of the Fund's annual report at [www.nuveen.com/NPFD-annual-report](http://www.nuveen.com/NPFD-annual-report).

**Average earnings per share** and **average undistributed net investment income (UNII) per share** are estimates, using an average of the last three months, except for preferred securities funds, mortgage-backed securities funds and floating rate funds, which use an average of the last six months.

**Distribution Rate** at market price and NAV is calculated by annualizing the most recent declared regular distribution and dividing by the fund's market price or NAV, respectively. Special distributions, including special capital gains distributions, are not included in the calculation.

The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her financial professional.

## Glossary

The **NPFD Blended Benchmark** consists of 80% ICE Variable Rate Preferred & Hybrid Securities Index and 20% ICE USD Contingent Capital Index. The **ICE Variable Rate Preferred & Hybrid Securities Index** is designed to measure the performance of floating- and variable-rate investment grade and below investment grade USD-denominated preferred stock and hybrid debt publicly issued by corporations in the U.S. domestic market. The **ICE USD Contingent Capital Index (CDLR)** is designed to track the performance of USD-denominated contingent capital debt publicly issued in the major domestic and Eurobond markets, including investment grade and below investment grade issues. **It is not possible to invest directly in an index.**
