Aligning with the Sustainable Development Goals (SDGs)

Nuveen Short Duration Impact Bond Fund

Number of impact holdings aligned with SDGs¹

as of 31 Dec 2024

Source: Nuveen Proprietary Taxable Fixed Income Impact Framework. Utilizes most recently assigned SDG alignment. Starting 31 Oct 2024, Nuveen employed Bloomberg to be the single source of information on the hierarchy of entities thus switching from multiple vendors to one and, consequently, the ESG metrics may be slightly modified. 1) Total count of SDG alignment for all impact holdings. An individual impact holding could be aligned with up to three SDGs: Primary SDG, Secondary SDG, and Tertiary SDG based on our proprietary impact framework. Therefore, the total count of SDGs is greater than the number of impact holdings. 2) Based on the market value of impact holdings by their Primary SDG alignment. Each holding has one "primary" SDG; therefore, this graph represents 100% of the portfolio AUM held in impact designated securities. *Given that the use of proceeds for certain bonds align to both green and social projects, impact or allocation reporting from the issuer is needed to assign SDG alignment.

Our impact reporting approach

Nuveen Short Duration Impact Bond Fund

Social and environmental impact data is sourced directly from issuer disclosures, covering the most commonly reported metrics under each theme for activities occurring in 2024. Impact data included in this report illustrate the annual outcomes of the securities in which the portfolio invested as of year-end, not a fractional calculation of the portfolio’s capital alone.

We rely upon four types of issuer disclosures, listed in order of preference below. Our goal is to narrow the scope of the impact data to those activities financed directly or indirectly by the portfolio’s investments, while also covering as much of the portfolio as possible.

- 1. **Security-level data:** *sourced from security-specific impact reports; most preferred*
- 2. **Project-level data:** *sourced from project factsheets or other reports tied to a specific project*
- 3. **Program-level data:** *sourced from impact reports aggregating impact for a portfolio of bonds*
- 4. **Issuer-level data:** *sourced from annual reports covering all activities of the issuer; least preferred*

Sources of 2024 impact data by disclosure type

As of 31 Dec 2024.

Reporting Methodology

The Nuveen Responsible Investing team developed this report to provide an indication of the aggregate social and environmental impact created by the projects and organizations financed in part by the Strategy. Given the difficulty of attributing impact in proportion to the size of the Strategy's share of each bond issuance (which ranges from 0.015% to 100%), the data reflect total impact generated by the project, program, or issuer rather than the Strategy's share alone.

The report represents bonds that are classified under the Strategy's proprietary impact framework and for which relevant data are available. All impact data are sourced from publicly available issuer disclosures at the bond or project level when possible, or the program or issuer level if not. For certain U.S. renewable energy projects, U.S. Energy Information Administration data used to supplement generation data: <https://www.eia.gov/>.

Metrics selected for each impact theme reflect the information most commonly reported by issuers, and each metric includes data from between 1 and 32 issuers. In cases where the Strategy has a large position in a certain issuer, we prioritize selecting metrics reported by that issuer.

Highlighted country information was determined by issuer reporting or country of risk information.

Holdings with no metrics available include new projects with no results yet, projects in development, issuers with misaligned reporting timelines or with metrics that did not align with Nuveen's, and issuers for whom we could not locate impact reporting.

5 Average US households use approximately 300 gallons of water per day (109,500 gallons per year). <https://www.epa.gov/watersense/how-we-use-water>

A TIAA Company

The Nuveen Short Duration Impact Bond Fund seeks favorable returns versus the short-term bond market while offering the opportunity to invest for impact.

Short-term bond allocation: Actively managed, high-quality short-term bond portfolio pursues excess returns and improved risk-adjusted results versus a traditional broad-market benchmark

Environmental and social impact without sacrificing return: Prioritizes bonds that direct impact across multiple sustainable and socioeconomic themes without compromising return potential

ESG leadership: For non-impact securities, ESG quality is assessed within each sector and industry, enabling the identification of best-in-class issuers across key bond market segments required to build a diversified portfolio and manage risk¹
