

Nuveen Missouri Quality Municipal Income Fund (NOM)

3Q 2021 | As of 30 Sep 2021

Fund description

The Fund seeks current income exempt from federal and Missouri income tax. The secondary objective is the enhancement of portfolio value.

The Fund invests in municipal securities that are exempt from federal, Missouri state, and local income taxes. The Fund invests at least 80% of its managed assets in securities rated, at the time of investment, investment grade or, if they are unrated, are judged by the manager to be of comparable quality. The Fund may invest up to 20% of its managed assets in municipal securities rated below investment grade or judged by the manager to be of comparable quality, of which up to 10% of its managed assets may be rated below B-/B3 or of comparable quality. The Fund uses leverage.

- Total Investment Exposure is the total of the Fund's managed assets plus any additional economic exposure the Fund has due to its investments in certain securities.
- Effective leverage is the Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative investments in the Fund's portfolio that increase the Fund's investment exposure. Regulatory leverage consists of preferred shares issued by or borrowings of a fund. Both of these are part of a fund's capital structure. Regulatory leverage is subject to asset coverage limits set in the Investment Company Act of 1940. For more information, see Understanding Leverage on www.nuveen.com/cef.
- Percent allocations, calculations, and averages reflect the Fund's full investment exposure, including the full value of bonds held in tender option bond trusts that have issued residual inverse floating rate securities that the Fund holds.
- Debt characteristics (duration, maturity, bond price) are relative to the percentage of the portfolio invested in debt securities.

1 Average earnings per share and average undistributed net investment income (UNII) per share are estimates, using an average of the last three months, except for preferred securities funds, mortgage-backed securities funds and floating rate funds, which use an average of the last six months.

2 Distribution Rates represent the latest declared regular distribution, annualized, relative to the market price and NAV. Special distributions, including special capital gains distributions, are not included in the calculation.

3 Percent allocations, calculations, and averages reflect the Fund's full investment exposure, including the full value of bonds held in tender option bond trusts that have issued residual inverse floating rate securities that the Fund holds.

4 For the percentage of the portfolio in debt, preferred and other hybrid securities, including CoCos (if any). Percentages reflect the percentage of the Fund's investment exposure callable in the timeframe relative to the "as of" date shown. The "Next 12 months" figure (if shown) includes investments that are currently callable, as well as callable in the next 12 months. Securities subject to call may not be called.

Glossary

Average Coupon is the average coupon rate, or amount of interest paid as expressed by a percentage, of all fixed-income investments in the Fund's portfolio. **Effective Maturity** is the weighted average of the effective maturity dates of the fixed-income securities in the Fund's holdings. A bond's effective maturity takes into account the possibility that it may be called by the issuer before its stated maturity date. In this case, the bond trades as though it had a shorter maturity than its stated maturity. **Leverage Adjusted Effective Duration** is the

Fund's average effective duration adjusted for the impact of the Fund's utilization of leverage in the form of senior securities as defined by Section 18 of the Investment Company Act of 1940. Funds that utilize leverage in the form of senior securities will have a leverage-adjusted effective duration that is longer than its baseline effective duration.

A word on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Debt or fixed income securities** such as those held by the Fund, are subject to market risk, credit risk, interest rate risk, derivatives risk, liquidity risk, and income risk. As interest rates rise, bond prices fall. **Leverage increases** return volatility and magnifies the Fund's potential return and its risks; there is no guarantee a fund's leverage strategy will be successful. **State concentration** makes the Fund more susceptible to local adverse economic, political, or regulatory changes affecting municipal bond issuers. These and other risk considerations such as **inverse floater risk** and **tax risk** are described in more detail on the Fund's web page at www.nuveen.com/NOM
