Monthly Capital Return Plan Policy Distribution

JQC has adopted a capital return plan through which the fund will return to shareholders 20 percent of the fund's common assets, over a period of three years ending on December 31, 2021, through supplemental amounts included in the fund's regular monthly distribution. Distribution sources will include net investment income and return of capital and may include realized gains. The fund will provide a notice of the best estimate of its distribution sources at that time which may be viewed at: www.nuveen.com/CEFdistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year.

You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate.

The following dates apply to today's monthly capital return distribution declaration for the following closed-end fund:

Record Date	November 15, 2019
Ex-Dividend Date	November 14, 2019

Monthly Cash-Flow Based Distributions

Each of the two taxable funds listed immediately below have adopted a cash-flow based distribution program. Historical distribution sources have included net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the fund provides a notice of the best estimate of its distribution sources at the time of payment which may be viewed at: www.nuveen.com/CEFdistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year.

You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate.

The following dates apply to today's monthly cash-flow based distribution declarations for the following closed-end funds:
