

Nuveen Closed-End Funds Declare Distributions

Distributions Highlight Nuveen's Broad Range of Strategies for Income-Seeking Investors

- *Regular Monthly Tax-Exempt and Taxable Fund Distributions*
- *JQC Declares Monthly Capital Return Plan Distribution*
- *JLS Declares Monthly Cash-Flow Based Distribution*
- *JRI and NDMO Declare Monthly Managed Distributions*
- *Three Funds Declare Regular Quarterly Managed Distributions*

NEW YORK, December 1, 2020 – Several Nuveen closed-end funds have declared distributions. These funds represent investment strategies for investors seeking diversified sources of cash flow to prepare for and sustain their retirement income needs. For further information regarding fund distributions including earnings, undistributed net investment income, and notices please visit <http://www.nuveen.com/cef>.

Shareholders can expect regular distribution information to be posted on www.nuveen.com on the first business day of each month. To ensure that our shareholders have access to the latest information, timely distribution and fund updates can be subscribed to at www.nuveen.com/subscriptions, under the closed end funds tab of the Product Documents section. You can also follow updates by navigating to the Closed-End Fund section of our Resource Center, located at www.nuveen.com/resource-center.

Monthly Capital Return Plan Policy Distribution

JQC has adopted a capital return plan through which the fund will return to shareholders 20 percent of the fund's common assets, over a period of three years ending on December 31, 2021, through supplemental amounts included in the fund's regular monthly distribution. Distribution sources have historically included net investment income and return of capital, and may also include realized gains in the future. It is expected under the capital return plan that regular monthly distributions will include supplemental amounts in addition to net investment income which would normally represent either realized gains or a return of capital, and the fund will provide a notice of the best estimate of its distribution sources at that time, which may be viewed at www.nuveen.com/CEFDistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year.

You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate.

The following dates apply to today's monthly capital return distribution declaration for the following closed-end fund:

Record Date **December 15, 2020**
Ex-Dividend Date **December 14, 2020**
Payable Date **December 31, 2020**

JQC	NYSE	Nuveen Credit Strategies Income Fund	\$.0810	-

Monthly Cash-Flow Based Distributions

JLS has adopted a cash-flow based distribution program. Historical distribution sources have included net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the fund provides a notice of the best estimate of its distribution sources at the time of payment which may be viewed at www.nuveen.com/CEFdistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year.

You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate.

The following dates apply to today's monthly cash-flow based distribution declarations for the following closed-end funds:

Record Date **December 15, 2020**
Ex-Dividend Date **December 14, 2020**
Payable Date **December 31, 2020**

Monthly Managed Distributions

The goal of a fund's managed distribution program is to provide shareholders relatively consistent and predictable cash flow by systematically converting its expected long-term return potential into regular distributions. As a result, historical distribution sources have included net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the fund provides a notice of the best estimate of its distribution sources at that time which may be viewed at www.nuveen.com/CEFdistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year.

Under a Managed Distribution policy, each of the funds listed immediately below seeks to maintain an attractive and stable regular distribution amount that, over the long term, matches the fund's total distributions paid to its total return. You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate. Actual returns likely will differ from projected long-term returns (and therefore a fund's distribution rate), at least over shorter time periods. Over a specific timeframe, the difference between actual returns and total distributions will be reflected in an increasing (returns exceed distributions) or a decreasing (distributions exceed returns) fund net asset value.

A return of capital is a non-taxable distribution of a portion of the fund's capital. When fund returns exceed distributions, return of capital may represent portfolio gains earned, but not realized as a taxable

capital gain. In periods when fund returns fall short of distributions, it will represent a portion of your original principal unless the shortfall is offset during other time periods over the life of your investment (previous or subsequent) when the fund's total return exceeds distributions.

Quarterly Taxable Managed Distributions

The goal of a fund's managed distribution program is to provide shareholders relatively consistent and predictable cash flow by systematically converting its expected long-term return potential into regular distributions. As a result, historical distribution sources have included net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the fund provides a notice of the best estimate of its distribution sources at that time which may be viewed at www.nuveen.com/CEFdistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year.

Under a Managed Distribution policy, each of the funds listed immediately below seeks to maintain an attractive and stable regular distribution amount that, over the long term, matches the fund's total distributions paid to its total return. You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate. Actual returns likely will differ from projected long-term returns (and therefore a fund's distribution rate), at least over shorter time periods. Over a specific timeframe, the difference between actual returns and total distributions will be reflected in an increasing (returns exceed distributions) or a decreasing (distributions exceed returns) fund net asset value.

A return of capital is a non-taxable distribution of a portion of the fund's capital. When fund returns exceed distributions, return of capital may represent portfolio gains earned, but not realized as a taxable capital gain. In periods when fund returns fall short of distributions, it will represent a portion of your original principal unless the shortfall is offset during other time periods over the life of your investment (previous or subsequent) when the fund's total return exceeds distributions.
