

## Nuveen Dow 30<sup>SM</sup> Dynamic Overwrite Fund (DIAX)

Marketing communication | 3Q 2024 | As of 30 Sep 2024

### Fund description

The Fund is designed to offer regular distributions through a strategy that seeks attractive total return with less volatility than the Dow Jones Industrial Average (DJIA or "Dow 30") by investing in an equity portfolio that seeks to substantially replicate the price movements of the DJIA, as well as selling call options on 35%-75% of the notional value of the Fund's equity portfolio (with a 55% long-term target) in an effort to enhance the Fund's risk-adjusted returns.

Distribution sources may include net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the Fund provides a notice of the best estimate of its distribution sources at that time which may be viewed at [nuveen.com/CEFDistributions](http://nuveen.com/CEFDistributions). These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate. The fund's regular monthly distributions may be subject to federal and/or state and local taxes and may be re-characterized as ordinary income. Any re-characterization will be reported in shareholders' 1099-DIV forms after the end of the year. Income exempt from federal income tax may be subject to state and local taxes and the alternative minimum tax. Capital gains, if any, will be subject to capital gains tax.

## Additional Distribution Information (as of 31 Aug 2024)

The following table provides estimates of the Fund's distribution sources, reflecting year-to-date cumulative experience through the latest month-end. The Fund attributes these estimates equally to each regular distribution throughout the year. Consequently, the estimated information shown below is for the current distribution, and also represents an updated estimate for all prior months in the year. If any non-zero number is shown under "Return of Capital" in the table below, that means that the Fund estimates that it has distributed more than its net income and net realized capital gains, and that therefore a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income." The amounts and sources of distributions reported below are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Data as of 31 Aug 2024

DIAX (FYE 12/31)	Per Share Distribution	Estimated-Per-Share Sources of the Distribution*				Estimated Percentage of the Distribution

\*Net investment income (NI) is a projection through the end of the current calendar quarter using actual data through the stated month-end date above. Capital gain amounts are as of the stated date above. The NI estimates above are based on prior year attributions which can be expected to differ from the actual final attributions for the current year.

The following table provides information regarding DIAX's distributions and total return performance over various time periods. This information is intended to help you better understand whether returns for the specified time periods were sufficient to meet distributions.

## Important information on risk

Investing in closed-end funds involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Closed-end fund shares may frequently trade at a discount or premium to their net asset value. **Common stock** returns often have experienced significant volatility. The Fund may not participate in any appreciation of its equity portfolio as fully as it would if the Fund did not sell **call options**. In addition, the Fund will continue to bear the risk of declines in the value of the equity portfolio. Because **index options** are settled in cash, sellers of index call options, such as the Fund, cannot provide in advance for their potential settlement obligations by acquiring and holding the underlying securities. For these and other risks, including

**tax risk**, please see the Fund's web page at [www.nuveen.com/DIAX](http://www.nuveen.com/DIAX).

## Glossary

**Average Call Option % Coverage** is the percentage of the Fund's underlying equities overwitten by call options; equals sum of notional values of call options divided by the market value of equities in the portfolio. **Average Call Strike vs. Spot Price** is the average ratio of call option strike prices vs. spot prices, weighted by the notional value of the calls. **Weighted Average Days to Expiration** is the average days to expiration for all call options in the Fund's portfolio, weighted by notional values.
