Important information on risk

Investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved.

- **Equity investments** are subject to market risk, common stock risk, covered call risk, short sale risk, and derivatives risk. Prices of equity securities may decline significantly over short or extended periods of time.
- **Foreign investments** involve additional risks, including currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in emerging markets.
- Concentration in **infrastructure-related securities** involves sector risk and concentration risk, particularly greater exposure to adverse economic, regulatory, political, legal, liquidity, and tax risks associated with MLPs and REITs.
- **Preferred securities** are subordinate to bonds and other debt instruments in a company's capital structure and therefore are subject to greater credit risk.
- Due to the consideration of **ESG criteria**, the Fund may exclude investments of certain issuers for non-financial reasons and may forgo some market opportunities available to funds that do not use these criteria. This may cause the Fund to underperform the market as a whole or other funds that do not use an Impact Criteria or ESG investment strategy or that use a different methodology or different factors to determine an investment's impact and/or ESG investment criteria.
- The use of **derivatives** involves substantial financial risks and transaction costs.
- The Fund's potential investment in **other investment companies** means shareholders bear their proportionate share of fund expenses and indirectly, the expenses of other investment companies.
- Concentration in a particular sector may involve greater exposure to adverse economic or regulatory occurrences.

A complete description of the risks of investing in the Fund can be found in the Key Investment Information Document(s) (KIIDs) and the Prospectus.
